# Sports imaging

**Qscan Radiology Clinics offers a full spectrum of sports imaging services, including medical scans and interventional procedures to diagnose and manage musculoskeletal and sports-related injuries.**

Qscan works with everyone from elite athletes to amateur sporting teams to provide comprehensive care for every patient.

An extensive range of diagnostic sports imaging services is available at Qscan, including:

- 3T wide bore MRI, which provides higher quality and clearer images for diagnosis
- Dedicated musculoskeletal ultrasound imaging equipment and highly experienced sonographers
- Nuclear medicine bone scans
- X-ray and low dose CT for a wide range of conditions
- Pain management and image-guided interventional procedures performed under fluoroscopy, ultrasound, or ultra-low dose CT guidance. These include spinal and musculoskeletal cortisone injections, platelet rich plasma (PRP), and autologous tenocyte implantation (ATI).

# Imaging services that can help with common sports injuries and pain management

## Image-guided injections available for all areas of the body

### Elbow

#### MRI and ultrasound

- Tendinosis (Golfer's and tennis elbow)
- Ligament injuries
- Dislocation

### Shoulder

#### MRI, CT, and ultrasound

- Dislocation
- Subacromial bursitis and impingement
- Rotator cuff tendinosis
- Clavicle fractures and AC joint injuries
- Labral tear

### Hip

#### CT guided injection

- Hip injection of cortisone for femoroacetabular impingement

#### MRI

- Labral tear

### Hand and wrist

#### MRI

- Fractures
- Ligament sprains
- Tenosynovitis

### Hamstring and groin

#### MRI and ultrasound

- Hamstring strains and rupture
- Osteitis pubis
- Adductor tendinosis
- ABI, PRP and ATI injections

### Knee

#### MRI

- Anterior cruciate ligament (ACL) tear
- Meniscal tears

### Foot and ankle

#### MRI, CT, and ultrasound

- Achilles tendinosis and rupture
- Stress fractures
- Plantar fasciitis
- Intermetatarsal bursitis and neuroma
